## STEALTH MOTORCYCLE SPROCKETS

Supersprox stealth sprockets are the only hybrid sprocket available for street, MX, Off Road and ATV's. Our sprockets last longer, saving on running costs for your motorcycle. We can offer a full range of sprocket and chain kits for most modern motorcycles.

Supersprox-stealth will last 3 times longer than an aluminum sprocket and is between 10-50 % lighter than a steel sprocket (Depending on model and tooth number). We guarantee that our sprockets will outlast, outperform and outshine the competition or your money back.

Supersprox-stealth was developed for riding in extreme conditions, where aluminum sprockets can't handle the torque delivered through the chain drive system. Supersprox engineers conceived and developed the combination of the two materials in the millennium year. Supersprox have counted 15 world titles since that time year 2000.
