

# MAVERICK AXLE APPLICATION CHART- REV.40 SEPT. 2020

Maverick Distributing is your premier source for axles. We have tried/tested/marketed all of the competition over the last 7 years, and have found Demon and GSP product to be the finest out there. If you can find a better axle than Demon or GSP, for a competitive price, then buy it. They don't exist. If there were better axles out there, then we would have them. Don't take anything less, than a Demon or GSP for your axle needs.

**NEW!!!**

**GSP'S XTV REVOLUTION AXLE** It's a complete DRIVELINE SOLUTION due to it's "Hol-low Tube Twist" technology. Just think of it as a "FUSE" for your drivetrain. The hollow tube CV axle twist technology dramatically increases the strength and reliability of the CV axle all while reducing stress on the drivetrain.

 GSP5302039 AXLE,REVO X3 XDS/MAX F RH

**Demon Powersport HD (Heavy Duty) Series Axles** are a great way to upgrade your machine's axles without breaking the bank. Made of chromoly steel, these heavy duty axles will hold up well to the challenges you throw at it. Demons are designed for off-road use where an original factory axle may prematurely wear out or break due to extreme stress. Built with stronger components these axles are much stronger than the OEM replacement axles and as with the OEM replacement product line, no modifications are necessary for installation.

- \*Completely redesigned cage
- \*Thicker wall than the previous design
- \*More durable and stronger than ever
- \*Better performance
- \*Smaller window, increasing surface area minimizing fracture points
- \*Micro polished components
- \*Dual Heat Treated High Strength Chromoly Steel Shaft
- \*Built with stronger components than OEM axles
- \*Double plunge which allows more suspension
- \*Larger swing angle up to 47 degrees outboard
- \*Axles come fully assembled for direct plug & play
- \*Backed by a 12 - months warranty with no replacement fees

The **GSP HD line** is the natural upgrade from OEM axles, featuring OEM fitment with heavier duty components to offer enhanced durability. From the materials we use to the grease we apply, everything about the HD line's axles are engineered to withstand the rigors of extreme environments and applications.

### GSP AXLES

\* Oversized Heavy-Duty 4340 chromoly steel shafts increase strength by over 15%.

\* Oversized Outer Joints have a swing angle of up to 50° providing increased suspension travel and strength.

\* By using advanced engineering and the latest CNC machines, we are able to achieve a maximum swing angle of up to 45° on our Inner Joints.

\* Advanced CV Joint ball groove grinding methods ensure the smoothest, longest lasting finish by reducing friction and wear.

\* Many of our axles come with high strength and long lasting TPE boots that perform better and last longer in extreme environments.

\* Heavy duty Oetiker clamp for improved strength and durability.

\* Our XTV axles use high performance moly grease, designed to excel in extreme condition
